### My Favorite Packages

---

#### ChangeQuotes

*Converts single to double or double to single quotes.*

#### SublimeLinter

*SublimeLinter is a plugin for Sublime Text 3 that provides a framework for linting code.*

#### Cucumber Bundle

*A bundle for Sublime Text that provides syntax coloring and snippets for Cucumber and its Gherkin language.*

#### Githubinator

*This will allow you to select text in a Sublime Text file, and see the highlighted lines on GitHub's remote repo, if one exists.*

#### FileDiffs

*Shows diffs between the current file, or selection(s) in the current file, and clipboard, another file, or unsaved changes. Can be configured to show diffs in an external diff tool*
